

>> COMPANY POLICY <<

We are aware and committed to implement, maintain and constantly improve the quality sistem, information security sistem and our attitude to the environment that will prevent pollution. We are committed to fulfill all requirements regarding the law, obtained standards and principles of employee safety and helth.

In our work we will take into account:

- long term development of the company
- the purpose, context, vision and strategy of the company
 - risks and opportunities of the company
 - expectations of owners, customers and end users
- the needs of the enviroment and all other relevant interested parties

We will implement the company policy in accordance with the goals that we set once a year according to:

- Use of process management approach and zero defect principle
 - 100% delivery reliability
- Adequate qualification, motivation and awareness of employees
- The use of modern technologies that ensure an agreed level of quality at effective use of natural resources and energy
- Optimal use of environmental friendly raw materials that are suitable for recycling or easy disposal
 - Make products that are safe to use
 - Lowering the costs compared to achieved sales
- Confidentiality, integrity and availability of information and informations assets
